

ARC® PREDATOR™ QUICK-LOKS

PREDATOR™ quick-change discs minimize downtime and maximize productivity by combining ceramic hybrid grains and the ARC® Quick-Lok system.

TARGET MARKETS

- Aerospace
- Automotive
- Farm Equipment
- Food & Beverage
- Heavy Machinery
- Oil & Gas
- Shipbuilding
- Vessel Manufacturing

APPLICATIONS

- Blending
- Deburring
- Stock removal

METALS

- Aluminum
- Exotic Alloys
- Mild Steel
- Stainless Steel

BACKING STYLES & HARDWARE

PERFORMANCE COMPARISON

PREDATOR™ outworks conventional ceramic grains and traditional abrasives with:

30% cut increase

2x life expectancy

enhanced
cost-to-performance
ratio

lower total cost
of ownership

SELF-LUBRICATING CERAMIC HYBRID

PREDATOR™ ceramic hybrid material is a proprietary blend of self-lubricating abrasive grains, producing an aggressive cut. Integrated grinding aids further reduce grinding temperatures that extend the material life.

STRUCTURE SHOWS HYPER-SHARPENED CERAMIC HYBRID

THE PREDATOR™ SOLUTION

ACCELERATE PRODUCTION & SAVE TIME

The ARC® Quick-Lok system features quick and easy attachments that reduce set-up times, resulting in fewer equipment changes.

IMPROVE PRODUCT LONGEVITY

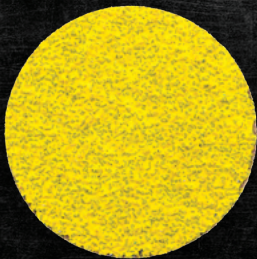

Engineered for reduced operator pressure, PREDATOR™ Quick-Loks continually expose new grains throughout the life of the product.

REDUCE PRODUCT SPENDING

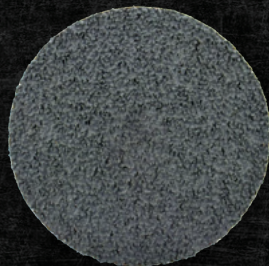

PREDATOR™ Quick-Loks are versatile and an ideal size for working in small, restricted areas. The aggressive cut rate allows you to complete more work with one product.

AVAILABLE IN:

PREDATOR™
CERAMIC HYBRID

PREDATOR™
RESIN FIBER

THE PERFORMANCE CUT YOU NEED

Baked into various products, Performance Coating is a specialized additive coating developed by ARC® that enhances product life and performance.

Performance coated products retain more grains and reduce loading, allowing more aggressive applications to soft metal fabrication. Works best on aluminum.
